

## CONTENTS

### SECTION 1 ATOMIC COLLISION PROCESSES

#### Invited Lectures

J. P. Sullivan, V. Vizcaino, S. Mondal, J. C. Lower, A. Jones, P. Caradonna,  
C. Makochekanwa and S. J. Buckman:

*Low energy lepton scattering - recent results for electron and positron  
interactions* ..... 13

Z. Lj. Petrović, Ž. Nikitović and V. D. Stojanović:  
*Modeling of anomalous Doppler broadened lines, thermalization of electrons  
and the role of radicals in discharges at high E/N*..... 14

A. Muñoz, F. Blanco, P. Limao-Vieira, P. A. Thorn, M. J. Brunger,  
S. J. Buckman and G. García:  
*Thermalisation of high energy electrons and positrons in water vapour*..... 15

A. Saenz:  
*Atomic and molecular systems in intense ultrashort laser pulses*..... 16

M. S. Schöffler, J. Titze, T. Jahnke, L. Ph. H. Schmidt, O. Jagutzki,  
T. Weber, H. Schmidt-Böcking and R. Dörner:  
*Investigating few particle dynamic - atoms and molecules under the reaction  
microscope*..... 17

#### Topical Lecture

J. P. Sullivan, C. Makochekanwa, A. Jones, P. Caradonna and S. J. Buckman:  
*Low energy positron scattering from helium*..... 18

#### Progress Reports

S. Dujko and R. D. White:  
*The multi term Boltzmann equation analysis of non-conservative electron  
transport in time-dependent electric and magnetic fields*..... 19

V. D. Stojanović:  
*Modeling of townsend discharges at high E/N and low pressure*..... 20

V. Petrović, V. Bočvarski and I. Petrović:  
*The expert systems for analysis of electron energy-loss spectra*..... 21

#### Contributed Papers

A. Banković, J. P. Marler, Z. Lj. Petrović, S. Dujko, R. D. White and  
G. Malović:  
*Relaxation of low energy positrons in molecular gases*..... 23

L. Campbell and M. J. Brunger:  
*Electron impact excitation in cometary comas*..... 27

I. V. Chernyshova, J. E. Kontros, O. B. Shpenik:  
*Contribution of autoionizing process into potassium atom ionization by  
electrons*..... 29

A. Domaracka, P. Możejko, E. Ptasińska-Denga and Cz. Szmytkowski:  
*Electron-scattering total cross sections for complex molecules: Group  
additivity rule*..... 35

## SECTION 2

### PARTICLE AND LASER BEAM INTERACTION WITH SOLIDS

#### Invited Lectures

|  |     |
|--|-----|
| A. Armigliato:<br><i>Characterization techniques for nano-electronics, with emphasis to electron microscopy. The role of the European project ANNA</i> .....                           | 137 |
| J. P. Gauyacq, A. G. Borisov and A. K. Kazansky:<br><i>Theoretical study of excited electronic states at surfaces, link with photo-emission and photo-desorption experiments</i> ..... | 139 |
| Z. L. Mišković:<br><i>Interactions of ions with carbon nano-structures</i> .....   | 140 |
| M. J. Goeckner, C. T. Nelson, S. P. Sant, A. K. Jindal, E. A. Joseph, B. S. Zhou, G. Pardon-Wells, B. Jarvis, R. Pierce and L. J. Overzet:<br><i>Plasma-surface interactions</i> ..... | 141 |

#### Topical Lectures

|   |     |
|---|-----|
| H. Khemliche, P. Soullisse, N. Bundaleski and P. Roncin:<br><i>Surface and thin film analysis using grazing incidence fast atom diffraction (GIFAD)</i> ..... | 142 |
| A. von Keudell:<br><i>Fundamental aspects in the plasma surface interaction during plasma sterilization</i> .....   | 143 |
| C. Lemell, B. Solleder, K. Tőkési and J. Burgdörfer:<br><i>Simulation of streaking experiments at surfaces</i> .....  | 144 |

#### Progress Reports

|  |     |
|--|-----|
| F. Aigner, N. Simonović, B. Solleder and J. Burgdörfer:<br><i>Decoherence in the diffraction of helium at surfaces</i> ..... | 145 |
|--|-----|

|   |     |
|---|-----|
| D. Borka, D. J. Mowbray, Z. L. Mišković, S. Petrović and N. Nešković:<br><i>Channeling of protons through carbon nanotubes</i> .....  | 146 |
| N. Bundaleski, H. Khemliche, P. Rousseau, A. Cassimi, P. Soullisse and<br>P. Roncin:<br><i>Collisions of ions with insulator surfaces: Charging and discharging dynamics</i> ....   | 147 |
| R. Zijlmans, S. Welzel, O. Gabriel, J. H. van Helden, J. Röpcke,<br>D. C. Schram and R. Engeln:<br><i>Unraveling the importance of surface association to the formation of<br/>molecules in a recombining <math>N_2/O_2</math> plasma</i> .....         | 148 |
| E. Kovačević, I. Stefanović, J. Berndt, C. Godde, J. Winter and L. Boufendi:<br><i>The nanoparticle formation in hydrocarbon plasmas</i> .....  | 151 |
| <b>Contributed Papers</b>   |     |
| N. N. Nedeljković, M. A. Mirković and D. K. Božanić:<br><i>Decay rates of large-<math>l</math> Rydberg states of multiply charged ions approaching<br/>solid surfaces</i> .....   | 153 |
| M. A. Mirković and N. N. Nedeljković:<br><i><math>l</math>-Distributions of the first electron transferred to multiply charged ions<br/>interacting with solid surfaces</i> .....   | 157 |
| M. D. Majkić, N. N. Nedeljković and S. M. D. Galijaš:<br><i>Neutralization distances of <math>Ar^{z+}</math> Rydberg ions interacting with solid surfaces</i> .....   | 161 |
| N. N. Nedeljković, S. M. D. Galijaš and M. B. Obradović:<br><i>Resonant vs. non-resonant neutralization of multiply charged ions in the<br/>interaction with solid surfaces</i> .....   | 165 |
| V. Borka-Jovanović, S. Petrović, D. Borka and N. Nešković:<br><i>Hyperchanneling of <math>Ne^{10+}</math> ions through the thick <math>\langle 111 \rangle</math> Si crystals</i> .....   | 169 |
| I. Telečki, S. Petrović, D. Borka and N. Nešković:<br><i>Axial channeling of high energy protons in carbon nanotubes</i> .....  | 173 |
| I. Radović, Lj. Hadžievski, N. Bibić and Z. L. Mišković:<br><i>Non-linear effects in interactions of fast ions with graphene</i> .....  | 177 |
| J. Vukanić and D. M. Davidović:<br><i>Backscattering of fast electrons from solids within a multiple collision model</i> .....  | 181 |
| J. Vukanić and R. Simović:<br><i>Inverse-square interaction potential in the multiple collision model of light ion<br/>reflection</i> .....   | 185 |
| A. R. Milosavljević, J. Jureta, Gy. Víkor, Z. D. Pešić, D. Šević,<br>S. Mátéfi-Tempfli, M. Mátéfi-Tempfli and B. P. Marinković:<br><i>Transmission of electrons through <math>Al_2O_3</math> nanocapillaries in the energy range<br/>2-120 eV</i> ..... | 189 |
| M. Nenadović, M. Popović, M. Novaković, N. Bibić and Z. Rakočević:<br><i>Structural and magnetic properties of Xe ion irradiated Co/Si bilayers</i> .....   | 193 |
| M. Nenadović, S. Štrbac, Z. Rakočević:<br><i>Surface texture parameters in optimizing magnetic force images</i> .....   | 197 |

|  |     |
|--|-----|
| M. Novaković, M. Popović, M. Milosavljević, D. Peruško, V. Milinović,<br>I. Radović and N. Bibić:<br><i>Microstructural changes of chromium-nitride thin films induced by argon ion<br/>implantation</i> ..... | 201 |
| M. Popović, M. Novaković, M. Milosavljević, D. Peruško, V. Milinović,<br>I. Radović and N. Bibić:<br><i>Ion beam modification of reactively sputtered TiN thin films</i> .....                                 | 205 |
| A. A. Elmonov, M. S. Yusupov, A. A. Dzhurakhalov and A. Bogaerts:<br><i>Sputtering of Si(001) and SiC(001) by grazing ion bombardment</i> .....  | 209 |
| M. V. Belkov, V. S. Burakov, V. V. Kiris and S. N. Raikov:<br><i>A new technique of solid material sampling for analytical atomic spectrometry<br/>with inductively coupled plasma</i> .....                   | 215 |
| V. Lazić, S. Jovićević, R. Fantoni, F. Colao:<br><i>Light scattering measurement of the gas bubble dynamics</i> .....  | 219 |
| E. Nedanovska, M. Ivković:<br><i>Fast photography of plasma formed by laser ablation of aluminum</i> .....   | 223 |
| M. S. Trtica, B. Gaković, B. Radak, D. Maravić, D. Batani and T. Desai:<br><i>Surface modifications of a Ti6Al4V implant/alloy by a picosecond Nd:YAG laser</i> .  | 227 |
| V. M. Ristić, T. B. Miladinović and M. M. Radulović:<br><i>Some aspects of including non-zero initial momenta into ionization of atoms<br/>by strong low-frequency laser fields</i> .....                      | 231 |
| V. Tarasenko, F. Ljubchenko, A. Panchenko, A. Telminov and A. Fedenev:<br><i>Dynamics of liquid metal surface under the action of XeCl-laser pulses</i> .....  | 237 |
| C. Lemell, B. Solleder, K. Tőkési and J. Burgdörfer:<br><i>Simulation of streaking experiments at surfaces</i> .....   | 241 |

### SECTION 3 LOW TEMPERATURE PLASMAS

#### Invited Lectures

|  |     |
|--|-----|
| J. Schulze, B. G. Heil, D. Luggenhölscher, R. P. Brinkmann and U. Czarentzki:<br><i>Stochastic heating in asymmetric capacitively coupled RF discharges and the<br/>PSR effect</i> .....       | 247 |
| C. Lazzaroni, X. Aubert, D. Marinov, O. Guaitella, G. Stancu, S. Welzel,<br>A. Pipa, J. Ropcke, N. Sadeghi, A. Rousseau:<br><i>Microplasmas and micro-jets</i> .....                           | 248 |
| A. P. Napartovich:<br><i>Atmospheric pressure non-thermal plasma: Sources and applications</i> .....   | 250 |
| M. Černák, D. Kováčik, A. Zahoranová and J. Ráhel:<br><i>Physical and plasmachemical aspects of diffuse coplanar barrier<br/>discharge as a novel atmospheric-pressure plasma source</i> ..... | 251 |
| V. Hoffmann, V. V. Efimova, M. V. Voronov, P. Šmíd, E. B. M. Steers,<br>J. Eckert:<br><i>Measurement of voltage and current in continuous and pulsed RF and DC<br/>glow discharges</i> .....   | 252 |

## Topical Lectures

|   |     |
|---|-----|
| G. Dilecce, P. F. Ambrico and S. de Benedictis:<br><i>Advances in optical diagnostics of atmospheric pressure dielectric barrier discharges</i> ..... | 253 |
| V. Fortov:<br><i>Pressure-temperature ionization of nonideal plasmas</i> .....  | 254 |
| A. Kobayashi:<br><i>Smart coating technology by gas tunnel type plasma spraying</i> .....   | 255 |
| D. O'Connell:<br><i>Excitation and ionisation dynamics in high-frequency plasmas</i> .....  | 256 |
| E. B. M. Steers, P. Šmíd and V. Hoffmann:<br><i>Effects of traces of molecular gases (hydrogen, nitrogen) in glow discharges in noble gases</i> ..... | 258 |
| V. Tarasenko:<br><i>Supershort avalanche electron beams and X-ray in high-pressure nanosecond discharges</i> .....                                    | 259 |

## Progress Reports

|  |     |
|--|-----|
| G. Lj. Majstorović:<br><i>Spectroscopic study of hydrogen rotational, vibrational and translational temperatures in a hollow cathode glow discharge</i> .....      | 261 |
| D. Petrović, T. Martens, J. van Dijk, W. J. M. Brok and A. Bogaerts:<br><i>Modeling of a dielectric barrier discharge used as a flowing chemical reactor</i> ..... | 262 |
| N. Puač:<br><i>Development, diagnostic and applications of radio-frequency plasma reactor</i> .....  | 263 |

## Contributed Papers

|   |     |
|---|-----|
| V. Stefleková, J. Jovović, N. M. Šišović and N. Konjević:<br><i>Balmer alpha line shape and surface morphology during depth profiling analysis of thin film</i> .....   | 265 |
| J. Jovović, N. M. Šišović and N. Konjević:<br><i>Doppler spectroscopy of the hydrogen Balmer beta line in a water vapour hollow cathode glow discharge</i> .....  | 269 |
| S. Djurović, R. J. Peláez, M. Ćirišan, J. A. Aparicio and S. Mar:<br><i>Xe III spectral lines width measurements</i> .....  | 273 |
| M. Ćirišan, R. J. Peláez, S. Djurović, J. A. Aparicio and S. Mar:<br><i>Stark shifts for several Xe II UV lines</i> .....   | 277 |
| J. Muñoz, M. S. Dimitrijević, C. Yubero and M. D. Calzada:<br><i>Use of the van der Waals broadening of atomic argon lines to measure the gas temperature in an atmospheric pressure Ar-He surface wave discharge</i> ....                    | 281 |
| A. Derzsi, Z. Donko, A. Bogaerts and V. Hoffmann:<br><i>The influence of the secondary electron emission coefficient and effect of the gas heating on the calculated electrical characteristics of a Grimm type glow discharge cell</i> ..... | 285 |

## SECTION 4 GENERAL PLASMAS

### Invited Lectures

|   |     |
|---|-----|
| K. Mima:<br><i>Present status and prospects of FIREX project</i> .....  | 437 |
| F. Pegoraro, M. Faganello and F. Califano:<br><i>Collisionless Kelvin - Helmholtz instability and vortex induced reconnection in the external region of the Earth magnetotail</i> ..... | 438 |
| M. M. Škorić and S. Sudo:<br><i>Simulation science for fusion plasmas</i> .....   | 439 |
| P. Rafanelli, S. Ciroi, F. di Mille, L. Vaona:<br><i>Multi-layer photoionization models of the nuclear and circumnuclear region of type 2 AGN</i> .....                                 | 440 |

### Topical Lecture

|   |     |
|---|-----|
| M. D. Calzada:<br><i>Spectroscopy methods applied to the research in plasmas at atmospheric pressure</i> .. | 441 |
|---|-----|

### Progress Reports

|  |     |
|--|-----|
| I. Čadež, S. Markelj, Z. Rupnik, P. Pelicon:<br><i>Processes with neutral hydrogen and deuterium molecules relevant to edge plasma in tokamaks</i> .....                               | 442 |
| A. Antoniou, E. Danezis, E. Lyratzi, D. Nikolaidis, L. Č. Popović and M. S. Dimitrijević:<br><i>Kinematical parameters in the coronal and post-coronal regions of the Oe stars</i> ... | 443 |
| S. Simić and L. Č. Popović:<br><i>Variability of GRB light curve: Shock wave model modification</i> .....  | 444 |
